ABOUT ME

Drawn to adventure, I am outgoing and love to explore different parts of the world and learn about other cultures.

I enjoy painting, scuba diving, and have been a gamer for as long as I can remember. I am currently learning how to use Unity software in order to create a video game of my own design.

I strongly believe in doing what makes you truly happy, and enjoying the journey that life will take you on to find it.

PROFILE

I am an up-and-coming front-end developer with the passion to create fascinating projects, interact with customers and produce a grand user experience.

In all endeavours, I strive to consistently produce high quality and detailed results in order to meet the needs of my client. As a strong communicator, I can liaise with others confidently to identify solutions and complete objectives to a mutually beneficial end. I am positive and open-minded, with transferable problem-solving skills which I instinctively apply to challenges that I may encounter.

I am a fast learner, technologically adept and able to swiftly familiarise myself with new software, tools and procedures to meet my working needs and function independently. By virtue of my interpersonal skills, mentoring experience and aptitude for programming, I have found joy in assisting my fellow SheCodes students on Slack with problem-solving coding errors. Given the opportunity and further guidance, I firmly believe I can produce captivating projects.

Regardless of the nature of my employment or volunteering, I am friendly, naturally enjoy aiding others and genuinely care about what I do. Patient, creative and flexible, I exude resourcefulness whether working as an individual or within a team. As a former forensic scientist and crime investigator, I am responsible, analytical and well-versed in handling sensitive information, working to guidelines, and I value confidentiality at all levels.

Highly adaptable, I have been raised, educated and employed in multi-cultural and diverse environments across the world. I love to meet people of all walks of life and I find that the best teams are formed of people from different backgrounds. Described by others as trustworthy, approachable and funny, I naturally click with people I cross paths with inside and outside of work.

With my strong attributes, enthusiasm and desire to grow, I am an effective asset within any field.
